(as of January, 2025)

Kaji Tech's Plastic Snap Button

Until not so long ago, almost all baby garments used metal snaps as fasteners. Incorporating metal snaps runs the risk of causing allergic reactions, causing harm to the sensitive skin of the baby. In some cases, there were even reports of the metal snaps being swallowed having been detached from the garment. Kaji tech's Plastic snaps solve most of these issues while reducing the severity of others. Our plastic snaps are allergen free, kind to sensitive skin and attach securely to the garment reducing the risk of it coming off. Plastic snaps are now found in great numbers in the market. "To deliver the safety and comfort to all babies" is not only our motto but also our responsibility and we will strive hard to extend our ambition to the world

- 1 Lightweight**

Because plastic snaps are 1/3rd the weight of metal snaps, they can be attached to soft and thin materials without weighing them down.
- 2 Anti-rust**

Since all parts are made of 100% POM, they are clean and free of rust-eliminating the risk of causing an allergic reaction.
- 3 Color Variety**

Available in 100 vibrant colors to suit every need. The high quality colors ensure no discoloration over long-term use.
- 4 Safety**

Kind to the skin and smooth open-close action ensures safety and ease-of-use for everyone from the young to the elderly.
- 5 Premium Quality (Made in Japan)**

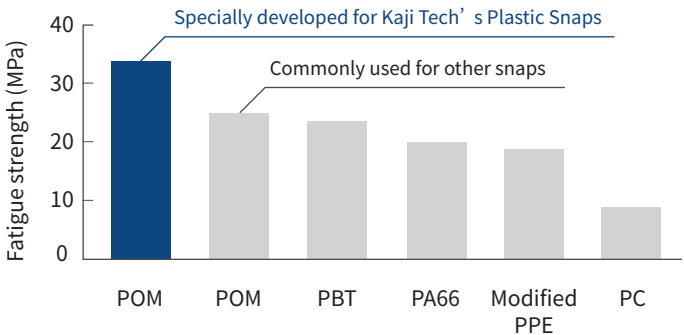

Snaps are manufactured fully and solely in Japan and are Oeko-Tex Standard 100 certified under class 1 (the strictest).
- 6 Customizability**

In addition to options like dyeing and coating, we are also able to cater to specific customization requests using laser engraving and other printing techniques.

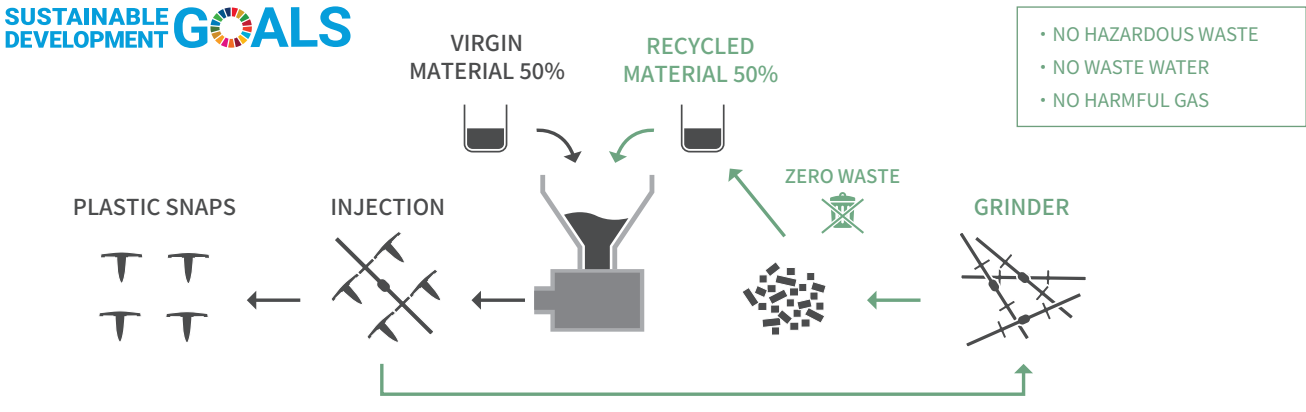

Performance of Kaji Tech's Plastic Snap Button

We use specially developed Top Grade POM for added strength & durability. All raw materials including POM are sourced domestically from within Japan

More than **1.8 billion Pcs** sold per year

Sustainable Production System

Material POM

Description

- SUNTENAC Series : ST-70 (9mm, 10mm) / ST-3 (10.8mm) / ST-5 (12.5mm) / ST-8 (14.7mm)
- Available in 3 different snapping strengths : Soft, Standard and Hard. (Super Soft available for ST-70)
- Use Cases : Baby Wear, Maternity Wear, Rain Gear, Diaper Covers, Kids Wear etc

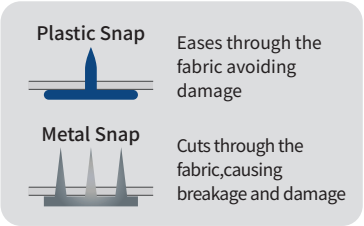

1 Japanese Standard Safety

No threat of allergies or skin irritation that metal snaps cause especially for infants and the elderly.

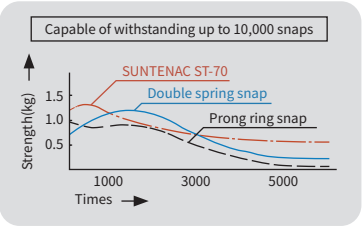

2 Kind to the fabric

The prong creates a gap in the fabric and passes through without breaking the structure and hence causing no damage.

3 Light-weight and Durable

Not only are the snaps light-weight, they have been tested to withstand up to 10,000 times of snapping without a drop in performance. The snaps are clean, have anti-rust properties and are bleach resistant.

Material POM

Description

- SUN GRIP Series : SG600 (11.5mm, 13mm) / SG800 (15mm) / SG1000 (18mm)
- Cap and Post available in 40 vibrant colors
- Use Cases : Jackets, Workwear, Outdoor Gear, Sportswear etc

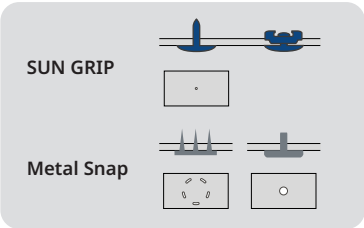

1 Reliability of MADE IN JAPAN

Soft fit, sturdy and snaps fit; Ideal for sports and outdoor wear.

2 Firmly Grips the Fabric

Gentle to the fabric; Socket and Stud on the back grip the material firmly to join the snap to the garment. Snaps pass through the gaps of the fabric to ensure no breakage is caused to the fibers while the prong grips firmly in place.

3 Designed for Luxury

The Socket and Stud feature a luxurious design. Winner of the Good Design Award, 1997.

Available Colors

* ☐ Standard colors for Socket and Stud

Material Cap : Nylon

Description

- Fashionable design made to look like regular sewn-on buttons
- SUN BUTTON SNAP Series : SBS (9.5mm, 11.5mm, 13mm, 15mm)
- Use Cases : Workwear, Sportswear, Uniforms, Medical wear, Nightwear etc

1 Reliability of MADE IN JAPAN

Features a threadless design ensuring no cracking or falling off. Gentle to the skin and safe for infants.

2 Threaded Button Design

Features a fashionable threaded design making it a snap that looks like a threaded button. Winner of the Good Design Award, 2014.

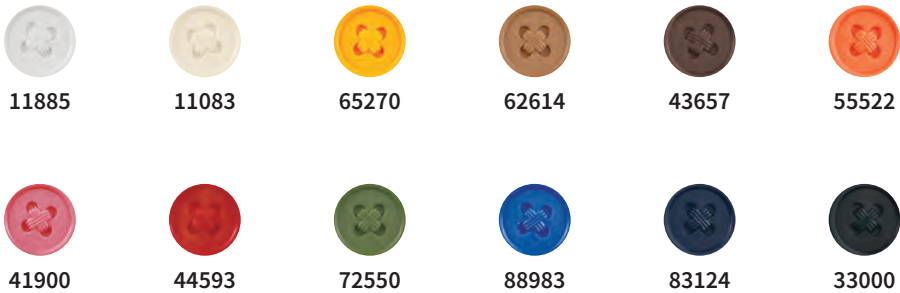

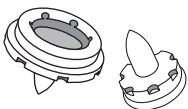

3 Light snapping action

Buttoning or Unbuttoning has never been easier with the release of our button-style snaps. Very little strength is required to fasten or unfasten, making it easy for the elderly and children, or even while wearing gloves!

Available Colors

Material POM

Description

- A First of its kind Kajitech’s original stylish plastic snap
- Softer snapping strength than a metal snap
- Use Cases : Outerwear, Bottoms, Concealed designs like Multilayered fabrics or pockets

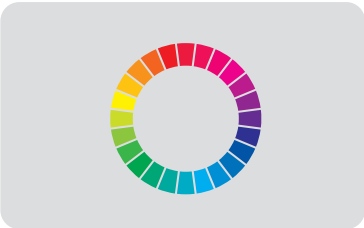

1 Reliability of MADE IN JAPAN

High Quality Made-in-Japan Plastic snap. Lighter than a Metal Snap of the same size and with multiple use cases.

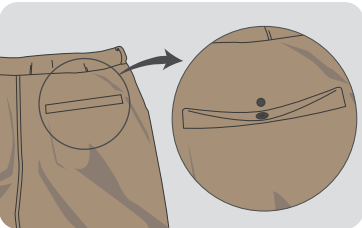

2 Can be Dyed to match (DTM)

SUN CONCEALED can be dyed to match any color of choice adding to versatility and further widening possibilities.

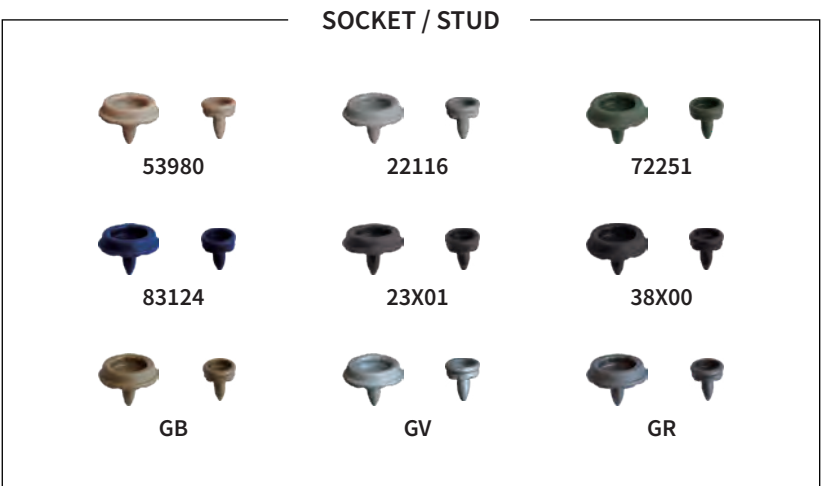

3 Stylish design

The Stylish design of SUN CONCEALED now makes possible achieving a simple concealed look using Plastic Snaps. The design of Socket and Stud ensures a seamless design with the least bulge.

Available Colors

Size : 10mm

Material Cap : Brass, POM

Description

- All snaps are made of high-quality Brass caps and are Nickel-free
- Capable of being passed under Needle detectors
- Use Cases : Jackets, Bottoms, Workwear etc

1 Reliability of MADE IN JAPAN

Features non-hazardous nickel-free brass. Non-detectable by needle detector with NC A standard.

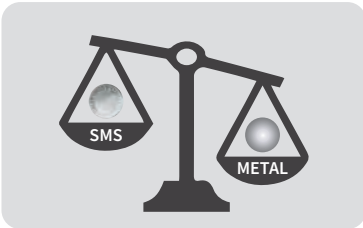

2 Metallic Design

Features a metal covered plastic cap known for its light weight and looks.

3 Light weight (50% lighter)

Metal covered cap makes it 50% lighter in weight compared to a normal brass snap of the same size.

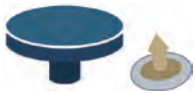

Available Colors

Size : 10mm, 13mm, 15mm

SPJ SUN PLASTIC JEANS BUTTON

Material Cap: POM
Pin : Brass, Aluminum

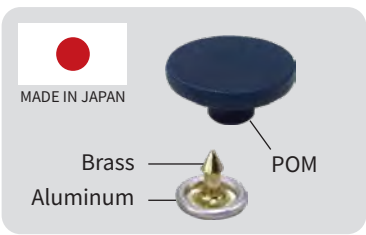

Description

- No Peel off or Fade. Available in 20 different colors in Matte finish
- Optional Logo Engraving available
- Use Cases : Children's wear, Denim garments, Outdoor wear, Work wear, etc

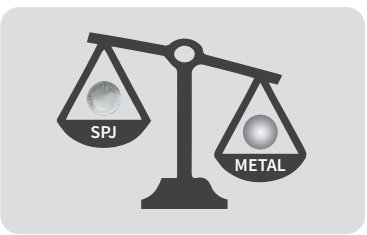

1 Reliability of MADE IN JAPAN

High quality tuck button used for apparel and other Miscellaneous goods.

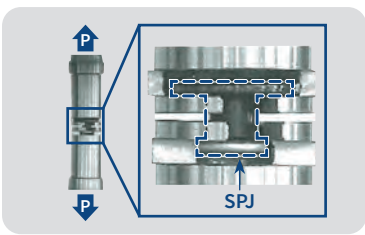

2 Light Material

Use of plastic makes the button 75% lighter than a usual metal button of the same size while maintaining the same if not better looks!

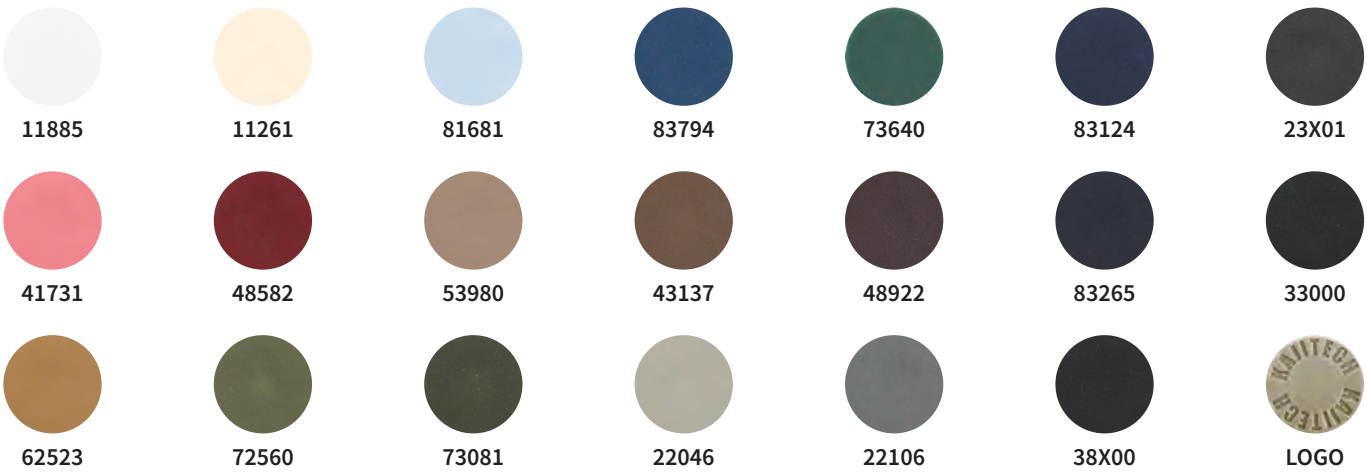

3 Toughened Material

Use of toughened POM makes the snap stronger with a tensile strength of up to 60kg; same as a metal button of the same size.

Available Colors

Size : 17mm

Available Machines

We at Kaji Tech believe that a sale is not the 'end' but the 'start' of our relationship. We provide high quality snap attachment machines with swift after-sales support. We also offer machine maintenance on regular intervals. We consider ourselves your partner in manufacturing and will strive to contribute as much as we can.

TM-3NR Hand Press Machine

TM 3NR is a table-top machine used for fastening snaps by hand. Can be set up anywhere as it is a Manual machine and does not require Power.

TM-35NR Foot Press Machine

TM-35NR is a machine used for fastening snaps by stepping on the pedal. Can be set up anywhere as it is a Manual machine and does not require Power.

TM-500SR Semi-Automatic Machine

TM 500SR is a Semi-Automatic snap fastening machine made with safety and operability in mind. It is fitted with a motor that makes fastening effortless. Design features easy die change and accurate attachments.

TM-200 Fully Automatic Machine

TM 200 is a Fully Automatic snap fastening machine made with safety and efficiency in mind. Fully automatic design negates the need for die changes or attachments and allows fastening effortlessly.

Production Capacity of our Snap Attaching Machines

Semi-Automatic Machine [1 set = 2 machines]
2,500 sets in 8 hours [62,500 sets in 25 days]

Fully-Automatic Machine [1 set = 2 machines]
10,000 sets in 8 hours [250,000 sets in 25 days]
